

2-callWORKSPACEmodel

Thiyanga Talagala

30 August 2017

Note:

The commands that I run on the console is saved in “2-call-workspace.R”. The answer to the problem is motivated from the example given in stackoverflow question

link is:<https://stackoverflow.com/questions/11155182/is-there-a-way-to-knitr-markdown-straight-out-of-your-workspace-using-rstudio>

```
load("model.RData")
```

```
RegressionModel
```

```
##  
## Call:  
## lm(formula = iris$Sepal.Length ~ iris$Sepal.Width)  
##  
## Coefficients:  
##      (Intercept)  iris$Sepal.Width  
##           6.5262           -0.2234
```
